

Prajwal Pidekar

Full Stack Developer · MERN Stack · Django REST · React 18 · Python
prajwal.pidekar@outlook.com | +91 82629 03533 | Amravati, Maharashtra
github.com/pidekarPrajwal | linkedin.com/in/prajwal-pidekar

Results-driven Full Stack Developer with 10+ months of production experience building end-to-end systems across frontend (React 18, Vite, Tailwind CSS, MUI) and backend (Django REST Framework, PostgreSQL, AWS S3) at Ordient Solutions Pvt Ltd. Proficient in the MERN stack, JWT authentication, CI/CD pipelines, and automated reporting systems. Strong foundation in Data Structures & Algorithms, OOP, and Agile/Scrum workflows. Seeking a Full Stack or Backend Developer role to deliver production-quality solutions within a high-performance engineering team.

EDUCATION

Sant Gadge Baba Amravati University	B.Sc. Computer Science	2021 – 2024 71%
Ramkrishna Junior College, Amravati	HSC — Science	2018 – 2020 61%
Ramkrishna Krida Vidyalaya, Amravati	SSC	2018 65%

TECHNICAL SKILLS

Languages:	JavaScript (ES6+), Python, Java, C, C++, TypeScript (Familiar)
Frontend:	React.js, React 18, Vite, HTML5, CSS3, EJS, Tailwind CSS, Bootstrap, Material UI (MUI 6)
Backend:	Node.js, Express.js, Django, Django REST Framework (DRF), REST APIs, API Integration
Databases:	PostgreSQL, MongoDB, MySQL (mysql2), SQL, NoSQL
Auth & Security:	JWT, SimpleJWT, Express-Session, RBAC, Secure Coding Practices
Cloud & DevOps:	AWS S3, boto3, django-storages, GitHub Actions CI/CD, EC2 Deployment, Vercel, Render
Tools & Libraries:	Git, GitHub, Postman, Chart.js, OpenPyXL, ReportLab, Pandas, python-docx, Flash, Dotenv
Methodologies:	Agile, Scrum, OOPs, DSA, MVC Architecture, CI/CD

PROFESSIONAL EXPERIENCE

Full Stack Developer · Ordient Solutions Pvt Ltd. Oct 2024 – Still Working..
Amravati, Maharashtra · On-site

► SP3 Attendance — Workforce Attendance Backend

Python · Django 4.2 · DRF · PostgreSQL · AWS S3 · SimpleJWT · OpenPyXL · ReportLab · Pillow

- Built RESTful APIs for GPS-geofenced punch-in/out with Pillow-generated image timestamp overlays, eliminating proxy punch fraud and enforcing data integrity via uniqueness constraints per employee/date/shift.
- Integrated AWS S3 (boto3/django-storages) for secure media storage; built ORM-aggregate analytics APIs with PostgreSQL indexed queries for shift-wise and designation-level dashboards.
- Automated PDF and Excel Muster Roll generation (ReportLab + OpenPyXL), cutting monthly payroll report creation from hours to seconds; implemented SimpleJWT refresh rotation and soft-delete patterns.

► SP3 Attendance — Admin Portal Frontend

React 18 · Vite 6 · Tailwind CSS · Material UI 6 · Chart.js · Axios · Google Maps API · GitHub Actions · EC2

- Developed a responsive workforce attendance admin portal with JWT + Axios interceptor auth, automatic token refresh, and role-based CRUD routing via custom useCrudGuard hook across six core modules.
- Integrated Google Maps API for geofenced punch location validation; built Chart.js dashboards for Required vs. Actual manpower visualizations; enabled one-click Excel/PDF/Muster Roll blob exports.
- Optimized bundle size using Vite code-splitting and React.lazy(); configured GitHub Actions CI/CD to deploy production builds to AWS EC2 via SCP with systemd zero-downtime restarts.

► Sumit-MIS — Municipal Waste & Fleet Management Backend

Python · Django · DRF · PostgreSQL · OpenPyXL · Pandas · NumPy · Gunicorn · JWT/Token Auth

- Developed RESTful APIs for fleet operations, maintenance records, fuel consumption, and employee management; built real-time analytics dashboards (area-wise sweeping, daily billing trends) for municipal projects.
- Designed automated Excel report generation (OpenPyXL + Pandas) with dynamic formatting, custom filters, and multi-project header handling, reducing manual operational reporting overhead significantly.
- Implemented RBAC using Token authentication for strict user authorization; debugged ORM query filtering bugs and handled edge cases for missing Ward/Area geographic data.

► MSPHC — Maharashtra State Police Housing Backend

Python · Django · DRF · PostgreSQL · ReportLab · python-docx · HarfBuzz · FreeType · deep-translator

- Built scalable RESTful APIs for full lifecycle tracking of police housing projects (AA Approvals, Tendering, Milestones, Expenditures, Handover) with real-time executive dashboards for CM and Board of Directors.
- Architected bilingual (English + Marathi) automated PDF and Word (.docx) report generation; engineered a custom Devanagari text-shaping engine (HarfBuzz + FreeType + fontTools) for official government compliance.
- Reduced document creation from hours to seconds; integrated deep-translator for dynamic Marathi status labels and GIN-indexed PostgreSQL queries for high-performance financial aggregations.

► SFL Punch — Field Force & Attendance Management Backend

Python 3 · Django 5 · DRF · PostgreSQL · django-crontab · ReportLab · OpenPyXL

- Developed RESTful APIs for field attendance (punch-in/out), leave approvals, site visit logs, and user profile operations; built automated PDF/Excel engines for monthly manpower analytics and location tracking.
- Configured django-crontab background jobs for automated email notifications and scheduled report delivery; optimized PostgreSQL queries, implemented API logging middleware, and resolved production issues.
- Digitized field team monitoring end-to-end, eliminating manual data entry errors and automating daily/monthly operational report delivery for field supervisors.

PERSONAL PROJECTS

On-Road Fuel Delivery System

2024

Node.js · Express.js · MySQL (mysql2) · EJS · EJS-Mate · Express-Session · Connect-Flash · Dotenv · Vercel

- Built an on-demand emergency fuel delivery web application allowing stranded motorists to request Petrol/Diesel to their location; developed RESTful backend routes using Node.js and Express.js for secure user registration, login authentication, and fuel order processing.
- Designed and managed relational MySQL schemas using mysql2 to persist user details and fuel transaction records; implemented input validation and structured database queries for seamless user profiles and order placement.
- Built dynamic server-rendered frontend views using EJS and EJS-Mate with session management (express-session) and real-time flash feedback (connect-flash), delivering a smooth end-to-end user experience. Deployed on Vercel. GitHub: github.com/pidekarPrajwal/on-road-fuel

WonderLust — Hotel Management System

2023

Node.js · Express.js · MySQL (mysql2) · EJS · EJS-Mate · Express-Session · Connect-Flash · Bootstrap · Dotenv

- Developed a full-stack hotel management web application as a learning project to understand MVC architecture, server-side rendering, and relational database design; implemented core features for room browsing, booking creation, and basic reservation management.
- Built backend routes using Node.js and Express.js for handling booking workflows; designed MySQL schemas to store hotel, room, and reservation records; applied session-based authentication with express-session for user login and access control.
- Rendered dynamic pages using EJS and EJS-Mate with Bootstrap for a clean, responsive UI; used connect-flash for form feedback and dotenv for environment configuration. GitHub: github.com/pidekarPrajwal/wonderlust

CERTIFICATIONS & TRAINING

- Data Structures & Algorithms — C++, Java | Cad-desk+
- MERN Stack Development Training — React.js, Node.js, Express.js, MongoDB | CCIT
- DCA — Diploma in Computer Applications | Aarna Technology

ACHIEVEMENTS & EXTRACURRICULARS

- **State/University-level Basketball Player** — Represented S.G.B.A.U team in West Zone and Ashwamedh tournaments; demonstrates leadership, teamwork, and composure under pressure.
- Languages: English | Hindi (Native) | Marathi (Native)
